4. FIRST AID MEASURES

Eye contact

Immediately flush eyes with plenty of cool water for at least 15 minutes. Get medical attention if irritation occurs.

Skin contact

For contact with molten material, leave material on skin and or immerse affected area in cold water. Seek immediate medical attention.

Ingestion

First aid is not normally required for the solid material; however if molten material is swallowed, get immediate medical attention.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media

For small fires: Chemical powder.

For large fires: Use water spray, fog or foam.

Unsuitable extinguishing media

Water jet.

Special protective equipment and precautions for fire-fighters

Fumes are extremely toxic when heated to decomposition.

Wear proper protective equipment. Exercise caution when fighting any chemical fire. Use water spray or fog for cooling exposed containers.

Special hazards arising from the substance or its combustible products

This material may burn , but will not ignite readily.

Resulting gases

Carbon oxides.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures.

Equip clean crew with proper protection. Respiratory protection equipment may be necessary.

Environmental precautions

Prevent entry to sewers and public waters. Notify authorities if product enters sewers or public waters.

Methods and materials for containment and cleaning up

Use appropriate tools to put the spilled solid in a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

Use a shovel to put the material into a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system.

7. HANDLING AND STORAGE

Precautions for safe handling

Keep away from heat. Keep away from sources of ignition. Empty containers pose a fire risk, evaporate the residue under a fume hood. Ground all equipment containing material. Do not breathe dust.

Conditions for safe storage, including any incompatibilities

Provide local exhaust or general room ventilation to minimize dust and/or vapour concentrations. Keep container closed when not in use.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure controls

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

Eyes

Use tightly sealed goggles.

Skin

Not normally required for solid material. The use of thermally resistant gloves is recommended when there is potential for exposure to molten wax.

Respiratory

In case of insufficient ventilation, wear suitable respiratory equipment.
